Professional Summary

Full Stack Software Engineer with 1+ years of experience specializing in Golang and modern JavaScript frameworks. Experienced in building scalable web applications, RESTful APIs, and microservices using Go, React, Next.js, and PostgreSQL. Strong knowledge of Clean Architecture, database optimization, Redis, Docker, and CI/CD.

Technical Skills

Languages: Go (Golang), TypeScript, JavaScript, SQL, HTML5, CSS3
Frameworks & Libraries: React.js, Next.js, Gin, GORM, Tailwind CSS
Databases & Caching: PostgreSQL, Redis
Tools & Platforms: Git, GitHub, Docker, Postman, VSCode, Vercel, Render
Core Concepts: REST APIs, gRPC, Clean Architecture, Concurrency, Goroutines, Channels, JWT, RBAC, Microservices, CI/CD

Professional Experience

Full Stack Developer Intern — **Bridgeon Solutions**
Sep 2025 – Present

- Developed responsive web applications using React.js, Next.js, TypeScript, and Tailwind CSS with cross-browser compatibility.
- Built scalable backend services and RESTful APIs using Go and Gin, handling concurrent requests efficiently.
- Implemented gRPC for high-performance inter-service communication, reducing API response latency by 25%.
- Optimized PostgreSQL operations using GORM and Redis caching, improving application performance by 30%.
- Deployed applications using Vercel and Render with CI/CD pipelines and containerized workflows.
- Collaborated on code reviews, debugging, testing, and feature development using Agile methodologies.

Projects

DevSync – Developer Collaboration Platform

- Architected a developer collaboration platform using Clean Architecture and Repository Pattern for modular and testable services.
- Implemented JWT authentication, refresh token rotation, email OTP verification, and Role-Based Access Control (RBAC).
- Built REST APIs for project management, team collaboration, and task tracking with complete CRUD operations.
- Integrated gRPC for internal microservice communication, improving system throughput by 40%.
- Implemented Redis Pub/Sub for event-driven real-time notifications and activity logging.
- Optimized PostgreSQL queries and Redis caching, reducing average API response time from 200ms to 50ms.
- Developed React frontend using TypeScript, TanStack Query, Zustand, and React Hook Form.
- Containerized the application using Docker and Docker Compose.

Sootika – Women's Clothing E-Commerce Platform

- Developed a full-stack e-commerce platform using React.js and Go following Clean Layered Architecture.
- Built REST APIs for product management, shopping cart, order processing, authentication, and authorization.
- Implemented JWT authentication and integrated PostgreSQL with GORM for data persistence and complex queries.
- Managed collaborative development and version control using Git and GitHub.

Education

Higher Secondary Education (Bio Science) — **Farook College, Kozhikode**
2023 – 2025
